## R Markdown

Hola, muy buenas. Vamos a ver como sale esto:  $\frac{a}{b}$  debería quedar de primera...  $\implies \oplus \Leftarrow$

$x^2yz = \frac{a}{s}$

versión normal del Sumatorio:  $\sum_{i=0}^n$

versión extendida del Sumatorio:

$$\sum_{i=0}^n$$

para usar ***mathbf**Negrita* se puede usar cualquiera de los dos ***bol**symbol*estilos

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##   Mean  :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.  :25.0    Max.    :120.00
```

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
